PROFESSIONAL SUMMARY

Software developer with a completed university curriculum in Computer Engineering (UNET) and 8+ years of experience building web applications with Vue.js, React, Next.js and Laravel. Specialized in migrating legacy systems to modern architectures, high-fidelity responsive interfaces and applied AI integration (RAG, LLMs and function-calling agents) in real products. Accustomed to full-time remote work with milestone-based delivery, clean code and asynchronous communication in technical English.

TECHNICAL SKILLS

- **Frontend:** Vue.js (Vue 3, Nuxt.js, Vuex, Pinia), React.js (Next.js, Redux), TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vuetify, SASS, BEM, Three.js, Canvas
- **Backend:** Node.js, Express, PHP, Laravel, Yii2, REST APIs, GraphQL (Apollo Server), token-based authentication (Sanctum, JWT)
- **Databases:** MySQL, PostgreSQL, Oracle, Prisma ORM, relational schema design
- **Artificial Intelligence:** LLM integration (OpenRouter, Cohere, OpenAI), RAG, function calling, conversational agents, prompt engineering
- **Tools & methodologies:** Git, GitHub Actions (CI/CD), Docker, SCRUM, Spec-Driven Development, unit testing (PHPUnit, Vitest), Cursor, CodeRabbit
- **Mobile:** Flutter, React Native (Expo)

PROFESSIONAL EXPERIENCE

Livelaps — Full-Stack Web Developer · Remote

Feb 2022 – Mar 2026

- Migrated 5+ legacy PHP Vanilla modules to Vue.js and Nuxt.js with full functional parity, cutting frontend page load times by ~30%.
- Developed business logic in Laravel and optimized MySQL queries for the product core.
- Introduced AI tools (Cursor, CodeRabbit) into the team's daily workflow, reducing code review time by ~25%.
- Supported the transition of modules to React.js while maintaining responsive layout standards.

Villartech C.A. — Full-Stack Web Developer · Hybrid

Oct 2020 – Feb 2022

- Led the frontend migration of a legacy product to Vue.js with Vuetify across 3+ projects sharing a multi-tenant Laravel API with roles and permissions.
- Built the web client of a social network consuming Laravel REST services (AngularJS frontend).

Feedback C.A. — Frontend Developer · Hybrid

Jul 2019 – Aug 2020

- Built modular, responsive interfaces in React with Redux for Came Pagos (payment gateway) and Medullaris.
- Implemented a Spanish/English i18n system in PHP for El Callao and admin consoles in Yii2 with Bootstrap for Abitab.

Villartech C.A. — Full-Stack Web Developer · Hybrid

Dec 2018 – Apr 2019

- Developed a Laravel REST API consumed by a React frontend with Redux (Blockstart project).

Develop Software — Freelance Full-Stack Developer · Remote

May 2017 – Oct 2018

- Callmed: Vue.js frontend with WebSockets, geolocation (Google Maps API) and role management on a Laravel MVC architecture.
- Aignep: interactive 3D configurator for compressor installations using Three.js and Canvas, dynamic multilingual website, Laravel backend with Doctrine, black-box QA and data model design.
- Audita: Laravel backend development and server-side data processing.

Sisteberca C.A. — Web Developer · On-site

Sep 2016 – Dec 2016

- Code, view and plugin modifications for Banesco Panamá's web platform (WordPress).

Udatabox — Web Developer · On-site

Jul 2015 – Jun 2016

- Legal case-management software (Yii2, jQuery, Ajax): design, development, server administration and later migration to a REST API.

SELECTED PROJECTS

- **Amsterdam to Vzla** — AI-powered multi-tenant e-commerce: Next.js 14 monorepo, React Native (Expo) mobile app, multi-currency payments, Socket.io, Prisma and LLMs via OpenRouter. github.com/lesm23031990/amsterdam-to-vzla
- **SportFlow** — Flutter mobile app with a GraphQL API (Apollo Server) and a conversational AI agent using Cohere and function calling. github.com/lesm23031990/SportFlow
- **CashFlow POS** — point of sale and daily cash-flow control: React with TypeScript, Node.js/Express REST API. cashflow-pos.onrender.com
- **Professional portfolio** — Vue 3 SPA with AI-assisted chat, i18n and CI/CD. lsalasdeveloper.me

EDUCATION

Computer Engineering — Universidad Nacional Experimental del Táchira (UNET), Venezuela

Full academic curriculum completed (2019). Degree certification in progress.

LANGUAGES

- Spanish: native
- English: intermediate (B1) — fluent technical reading of documentation and specifications; conversational skills actively improving
